$ pip install fastapi

Program1.py

```
from fastapi import FastAPI

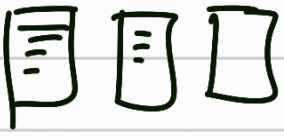

app = FastAPI()

@app.get("/about")
def about_us():
    return {"about us":
            "we are learning fastapi"}
```

$ uvicorn Program1:app --reload

(ctrl+Z

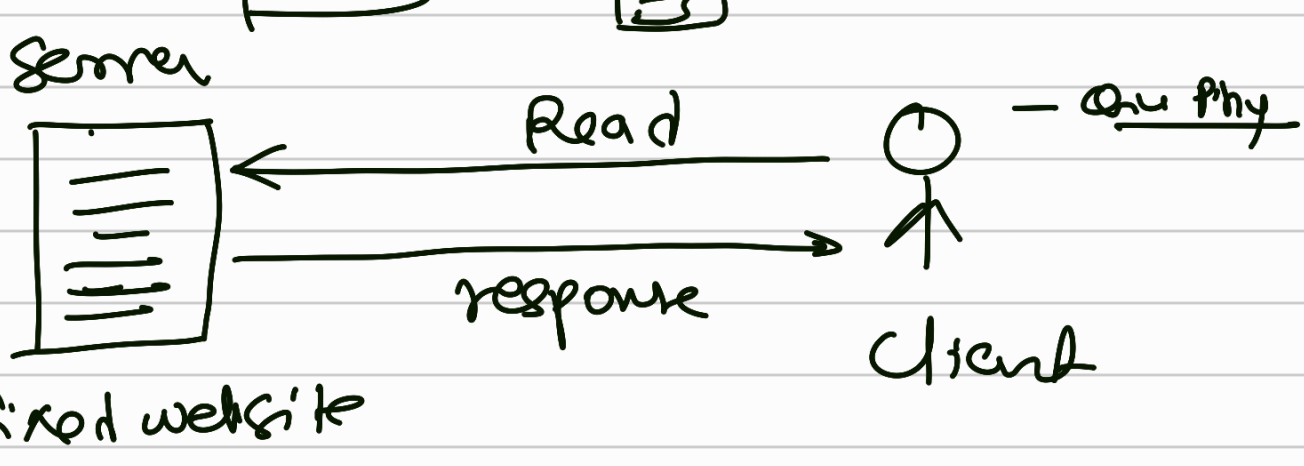

Software (website)

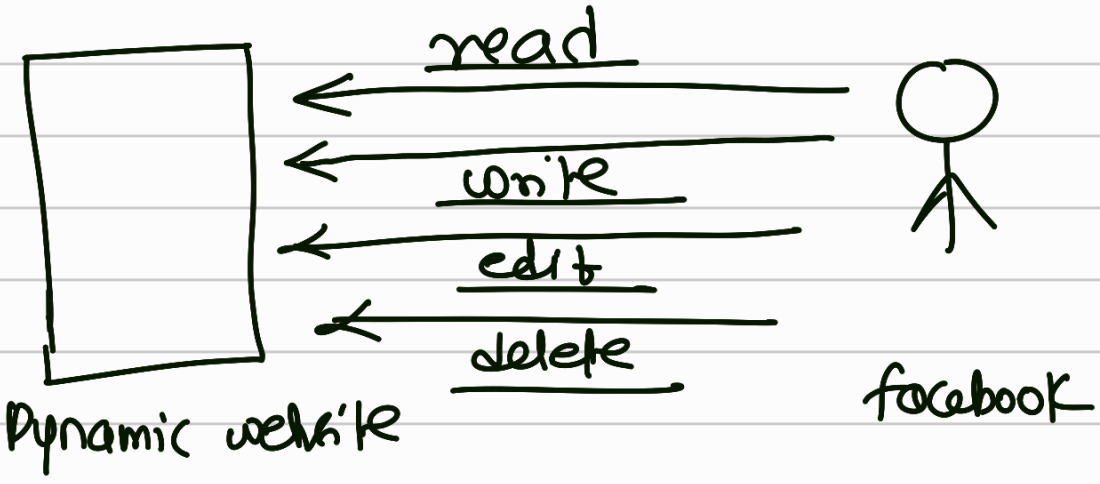

→ Static — 1) Newspaper
2) wikipedia, blogs

→ Dynamic → 1) Instagram
2) facebook

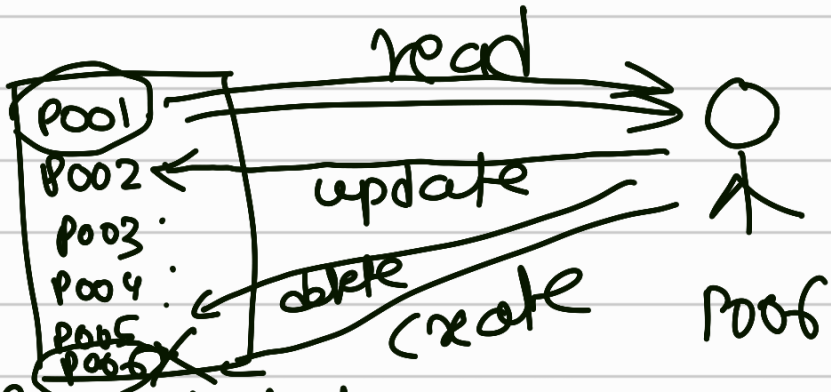

Dynamic Software

Post()- C — Create (Create new patient)

get()- R — Retrieve (read)

put()- U — update (modify)

delete()- D — delete

Patient data

```
from fastapi import FastAPI

app = FastAPI()

@app.get("/patient_read")
@app.post("/patient_create")
@app.put("/patient_update")
@app.delete("/patient_delete")
```

HTTP methods

1. get() method - Retrieve (Read)
2. post() method - Create
3. put() method - update
4. delete() method - delete

Path Parameter -

http://127.0.0.1:8000/view

→ Retrieve all patient data.

http://127.0.0.1:8000/view/P005

fixed / Static

dynamic

HTTP Status Code.

Retrive

200 - Okay - Sucess

201 - Resource Created - after post

204 - sucess - after delete

400 - Bad request - missing field, wrong data type
